

handle\_country

```
graph LR; A[handle_country] --> B[check_country_code]; A --> C[run_calibration];
```

A flowchart with a central node 'handle\_country' on the left, which is a gray rectangle. Two arrows originate from its right side: one points diagonally up and right to a white rectangle labeled 'check\_country\_code', and the other points diagonally down and right to a white rectangle labeled 'run\_calibration'. All rectangles have black borders.

check\_country\_code

run\_calibration
