

set_real_power_state

```
graph LR; A[set_real_power_state] --> B[get_gconf_int]; A --> C[init_wreq]
```

The diagram illustrates a function call sequence. A central box labeled 'set_real_power_state' has two outgoing arrows. The top arrow points to a box labeled 'get_gconf_int', and the bottom arrow points to a box labeled 'init_wreq'.

get_gconf_int

init_wreq
